

Wordpress Installation Guide

If you haven't already got hosting, I suggest [Hostgator](#).

For domain names, I suggest [Namecheap](#).

Website and article content writing, I suggest either [iWriter](#) or [GetArticlesDone](#).

For royalty free images, I suggest either [StockExchange \(SXC\)](#) or [Fotolia](#).

For Wordpress themes, I suggest [ThemeForest](#).

To generate random, secure, passwords use this [password generator](#).

The custom permalinks structure I suggest is:

`/%postname%/`
